

## Infections in Long-Term Care Settings: Emerging Issues

An Upcoming Theme Issue of JAMDA

# Call for Papers

Goal: Assemble in a single issue a series of original papers on emerging topics related to infections in long-term care, such as prevention; regulation; risk assessment; surveillance; antibiotic use, resistance patterns, and stewardship; staffing challenges; and others. All submissions must have relevance for practice and/or policy.

Article Types Included in this Call for Papers: Original studies, review articles, special articles, controversies in care, pragmatic innovations, and editorials. For details on submission types, see <https://www.jamda.com/content/authorinfo>

Submission Deadline: June 30, 2019.

Interested authors are encouraged to send a brief letter of inquiry (up to 300 words, specifying type of article and containing a draft abstract) to the managing editor at [jamda@jjeditorial.com](mailto:jamda@jjeditorial.com) before March 1, 2019.
